Directions (Q. 191-200): Read the following passage carefully and answer the questions given below it. Certain words/phrases have been printed in bold to help you locate them while answering some of the questions.

A large number of branches' of banks have been set up in the villages. The main purpose of setting up these banks is to develop the habit of saving among the villagers and also to give loans to farmers for **boosting** production in one way or the other. So far banks had been **concentrated** in the bigger

cities and Indian villagers had no faith in them. The new banks also intend to re-channel bank credit from the big industries to the small sectors. With the intention of promoting rural banking, regional rural banks were established. These aligned the local field with the rural problems. These banks are not to replace the other credit-giving bodies but to supplement them.

The Steering Committee of the Regional Rural Banks considered some structural changes. First of all they gave thought to the staffing spectrum, then to effective coordination among banks - rural cooperatives and commercial, and the possibility of bringing credit within the **access** of weaker sections. They wanted to recruit staff for the rural banks at lower salaries. But this type of discrimination would have been unfruitful. So it was given up.

A problem with regard to the rural banks is the creditworthiness of the poor. The Indian farmers are so poor that they cannot pay back their loans. The rural Indian surveys make it quite clear that practically rural farmers have no creditworthiness. Their socio-economic mobility is almost zero. That is why banks fear that their credit will never be paid back.

Another difficulty for the rural banks is that loans cannot be processed so easily. Processing loans also **entails** heavy expenditure. This was also going to affect their financial position. Still the establishment of the rural banks was decided because the social advantages were more important than the commercial consideration.

Rural banks definitely encourage savings. No doubt the villagers do not have to pay income tax and they get many other concessions, yet their saving is not **significant**. Despite all the hurdles, the rural banking system will boost up the economy of villages, and thereby the economy of the country.

- 4) discriminating between urban bank staff and rural bank staff.

Answers and explanations

1. 1; All stars are bottles (A) + Some bottles are papers (I) = A + I = No conclusion. However, neither statement is negative. Hence, All stars being papers is a possibility. Hence conclusion I follows.
Again, Some bottles are papers (I) + No paper is a calendar (E) = I + E = O = Some bottles are not calendars. Hence conclusion II does not follow.
2. 5; All stars are bottles → conversion → Some bottles are stars. Hence conclusion II follows.
All stars are bottles + Some bottles are papers + No paper is calendar = A + I + E = A + (I + E) = A + O = No conclusion. But some relationship between 'star' and 'calendar' exists. Therefore, 'All calendars being stars is a possibility' exists. Therefore, conclusion I follows.
3. 4; Some bottles are papers (I) + No paper is a calendar (E) = I + E = O = Some bottles are not calendars. Hence conclusion I does not follow.
And there is no definite positive or negative relation between star and calendar. Hence conclusion II does not follow.
4. 5; Some pencils are blankets (I) + All blankets are erasers (A) = I + A = I = Some pencils are erasers. Hence conclusion I follows.
Now, Some pencils are erasers, it means All erasers being pencils is a possibility. Hence conclusion II follows.

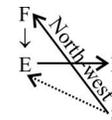

5. 2; Because there is no negative statement. Hence conclusion I does not follow.
But conclusion II is inherent in the first statement.
6. 5; **From I:** P > Q, but T is not the tallest.
From II: R > P, but S is not the tallest.
From I and II: R > P > Q. Neither S nor T can be the tallest. Hence R is the tallest.
7. 5; **From I:**

From II:

From I and II:

- Point E is to the north-west of Point S.
8. 2; **From I:** Possible months: January, February, March, April, May or June.
From II: Rahul's son correctly remembers that his father went on vacation after 31st March but before 1st May.

So his father went on vacation in the month of April.
Hence only II is sufficient.

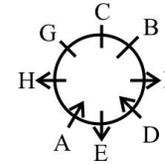

9. 3; **From I:** The possible day of exam is Wednesday.
From II: The third day of the week is Wednesday.
Hence, either statement I alone or statement II alone is sufficient.
10. 4; **From I:** Two-digit marks is less than or equal to 20.
Possible marks: 10, 11, 12, 13, 14, 15, 16, 17, 18, 19 and 20.
From II: Suman scored more than 9 marks.
Possible marks: 10, 11, 12, 13, 14, 15, 16, 17, 18, 19 and 20.
Hence statement I and II together are not sufficient.

37. 1; $A > B = C \dots(i)$; $E = F \dots(ii)$;
 $E \geq D > C \dots(iii)$

Combining all the three statements:

$$A > B = C < D \leq E = F$$

Check for I: $\underbrace{B = C < D \leq E}_{B < E}$

Thus I is true.

Check for II: $\underbrace{B = C < D \leq E = F}_{B < F}$

Thus II is not true.

38. 5; **Check for I:** $\underbrace{C < D \leq E = F}_{C < F}$

Thus I is true.

Check for II: $\underbrace{A > B = C}_{A > C}$

Thus II is true.

39. 4; $I \leq J \dots(i)$; $K < L > M \dots(ii)$;
 $J = K \dots(iii)$; $G \geq H = I \dots(iv)$
 Combining all these statements, we have
 $G \geq H = I \leq J = K < L > M$

Check for I: $\underbrace{H = I \leq J}_{H \leq J}$

Thus I is not true.

Check for II: $\underbrace{G \geq H = I \leq J}$

We can't compare G and J.

Thus II is not true.

40. 1; **Check for I:** $\underbrace{J = K < L}_{J < L}$

$\therefore L > J$

Thus I is true.

Check for II: $\underbrace{J = K < L > M}$

We can't compare J and M.

Thus II is not true.

 $\therefore x = 7$.
 Hence, $x > y$.

 Total sum of angles = $3x + 5x + 9x + 71^\circ = 360^\circ$

 Second largest angle = 54°
 Smallest angle = 45°
 Sum of angles of a triangle = 180°
 \therefore largest angle = $180 - 99 = 81^\circ$
 \therefore Difference = $81 - 45 = 36^\circ$.
